

ASXTradesET

Direct Access to ASX Trade Information

DIRECT MARKET ACCESS

ASXTradesET provides customers with comprehensive market trade information and has the ability to filter any or all markets available.

FEATURES

A major benefit of ASXTradesET is that it uses a standard simplified data feed, as per all RJE applications, replacing the need for a complex exchange interface.

HIGH PERFORMANCE

If exchange connectivity is lost, data recovery is restored from an internal file. This reduces recovery time and is faster than if data was requested from the exchange directly.

SUPPORT

24/7 software support can be offered through our gold star package option.

CUSTOMISATION

ASXTradesET can be customized to suit your business needs. The data feed can also be tailored to meet all your back-office requirements.

RELIABILITY

With over 35 years industry experience, RJE's applications operate throughout the Asia Pacific Region. Click [HERE](#) to find out more.

RJE Systems Pty Ltd is an Australian software company, operating for over 35 years in development and consultancy within the IT industry. By providing specialised applications in the [financial markets](#) and radio [broadcasting](#) industries, RJE has earned a reputation for delivering high quality systems on time and budget, coupled with a strong commitment to on-going support.
